

Prudential Consulting Inc. selects AnyWare Group for secure delivery of transcription and dictation services

ROAM secure access technology provides New Brunswick backbone

Saint John, N.B. – May 5, 2008 – Building on its major channel initiative announced last month, AnyWare Group, a provider of customer-driven healthcare solutions, announced today that Prudential Consulting Inc. (PCI) has signed an exclusive multi-year agreement that will enable it to deliver transcription and dictation services to healthcare providers securely and efficiently throughout Canada.

AnyWare Group's Role-Oriented Access Management (ROAM) technology will serve as the backbone of PCI's regional transcription and dictation services, allowing employees to connect to a hospital's information centre and download dictated patient reports and related clinical information – regardless of where the employee is working.

“AnyWare Group was our partner of choice due to its powerful ROAM technology and its extensive knowledge of the healthcare industry,” said Darrell Collier, Senior Vice President, Prudential Consulting Inc. “We are now able to extend our Made-in-Canada transactional, pay-as-you-go approach to hospitals, clinics and physicians across the country so they can make quicker diagnoses and provide faster treatment to their patients while simultaneously saving money.”

Today, more than 60 hospitals throughout North America have leveraged AnyWare Group's unique ROAM technology and Software as a Service (SaaS) business model to implement healthcare solutions in a cost-effective and scalable manner. ROAM allows healthcare organizations to extend the reach of their care teams and programs by leveraging the Internet, ROAM and the SaaS model. Organizations are using ROAM to deliver applications and information to users based on their role – anytime, anywhere.

“We are delighted to welcome Prudential Consulting Inc. as a healthcare partner and look forward to working with them to assist hospitals across North America in improving service delivery and eliminating their escalating financial burdens,” said Gerry Verner, CEO, AnyWare Group.

About Prudential Consulting Inc.

Prudential Consulting Inc., based in Toronto, is one of Canada's leading application service providers of technology and outsourcing services in Health Information Management (HIM).
