

AnyWare Group partners with Double-Take[®] Software

Partnership enables business continuity for healthcare organizations

Saint John, N.B. – June 08, 2008 – Natural disasters, terrorist attacks and public health crises such as influenza pandemic and SARS have North America’s healthcare industry carefully examining their emergency preparedness and disaster recovery plans. To ensure they don’t miss a beat especially during emergencies, AnyWare Group, a leading provider of customer-driven healthcare solutions, and Double-Take[®] Software, a leading provider of continuous data protection and recovery software, have signed a marketing partnership to collaborate on joint remote access and business continuity offerings.

Headquartered in Southborough, MA, Double-Take Software is a provider of affordable software for recoverability, including continuous data replication, application availability and system state protection. In a healthcare setting, Double-Take[®] data replication technology reduces downtime and data loss in patient data systems through continuous data replication and failover capabilities.

By leveraging the core strengths of both companies’ best-in-breed technologies to tackle business continuity and disaster recovery, Double-Take Software and AnyWare Group can discover new ways to deliver value in this ever changing but highly demanding solutions space.

“Double-Take Software has partnered with AnyWare Group to provide a comprehensive system to protect, manage, and recover business-critical data and applications,” said Christian Tate, Director of Business Development, Double-Take Software. “By leveraging Double-Take with AnyWare Group’s ROAM technology, users and administrators can access important information and applications, regardless of location or circumstances.”

Today, dozens of organizations throughout North America have leveraged AnyWare Group’s unique ROAM technology and Software as a Service (SaaS) business model to deliver applications and information to users based on their role – anytime, anywhere. ROAM has been particularly valuable in the healthcare industry, enabling hospitals to

extend the reach of their care teams and programs by leveraging the Internet, ROAM and the SaaS model.

“According to the United Nations’ 2008-2009 World Disaster Reduction Campaign, hospitals are safe when their health services are accessible and functioning at maximum capacity immediately after a disaster or an emergency,” said Gerry Verner, CEO, AnyWare Group. “Disaster recovery and business continuity is more than just knowing that information and mission-critical applications are safe – they also have to be accessible. Through this important marketing partnership, AnyWare Group and Double-Take Software will chart new territory in the remote access and data recovery spaces to assist healthcare and other industries across North America improve service delivery, boost productivity, and prepare for the unexpected.”
